 - Open ten months of the year.

Situation Seronera Valley, Central Serengeti National Park.

Activities Game viewing in the Serengeti

Lemala operates luxury small tented camps in Northern Tanzania. They are located in great locations and offer spacious very comfortable accommodation and sumptuous bush dining.

Lemala Ewanjan opened in June 2010 and will operate all year round (except in the long rains) as it is in a central location good for game all year in the Seronera Valley. The camp is on the western slopes of Makoma Hills with amazing views over the Serengeti plains, ideal for watching the migration, the grasslands or the sunsets! The popular game viewing areas of central southern and western serengeti are in easy reach, giving you chance to enjoy days out in the park and returning to this private camp and the solitude and personal service it prides itself on.

There are just seven luxury tents set out along the valley each with two queen size or one king size beds with duvets, they have flush toilets, large safari showers with running water, high quality wooden furniture and floors and an outdoor lounge. The tents have 24 hour solar lighting.

The central mess tent offers separate living and dining areas with a bar and has cosy sofas, rugs and areas to relax.

We recommend a minimum of three nights here, unless you are transiting through to the North of Serengeti.
