

Sombrero Chino

Further Links

- Snorkeling with penguins.
- Exploring interesting lava formations.

Situation

Sombrero Chino is a small island just off the coast of Santiago, close to the centre of the archipelago.

Activities

Exploring the wildlife of the island, snorkeling in the waters around the island.

This is a very scenic little island consisting of a huge cinder cone shaped a bit like a Chinese hat. There are all kinds of interesting lava formations. The brightly coloured sally lightfoot crabs are in stark contrast against the black rock. It is a good spot for snorkelling with sea lions and there is also a chance of seeing Galapagos penguins.
